

# ECO FLNTU

## Fluorometer and Scattering Meter

WET Labs offers the Environmental Characterization Optics (ECO) series of meters that incorporate a common set of options with a single basic design to make them ideal for a wide variety of deployments.

The FLNTU:

- Combines the unparalleled sensitivity of the ECO fluorometer with an optical scattering measurement at 700 nm for simultaneous determination of turbidity
- Ranges for output tailored to the environment
- Allows for assessment of fluorescence and turbidity variability and interactions
- Digital and analog output for easy integration into analog CTD packages or serial data streams
- Provides excellent precision, reliability and overall performance at a fraction of the cost and size of similar instruments
